

Index Description

- ❖ The Euronext® Reitsmarket GRESB Global Sustainable NR Index is designed to track specific factor trends in listed sustainable real estate securities worldwide through the performance of a portfolio of 30 global real estate securities selected using a factor ranking methodology and risk optimization techniques out of companies engaged in specific aspects of the major real estate developed markets of the world, namely North America, developed Europe and developed Asia Pacific.
- ❖ The Index constituents have to be part of the Sustainable Investment Universe objectively determined by GRESB on the basis of ESG performance criteria. GRESB is the global ESG benchmark and reporting standard for real assets including real estate and infrastructure.
- ❖ The factors ranking methodology is based on the intrinsic characteristics of the stocks that are part of the same region, namely their respective risk and dividend yield – and retains those securities with optimal combination of characteristics per region.
- ❖ The Index is expressed in Euro and is not currency hedged.

Losing months	62	65

(2) Measures the risk that the Index's performance deviates from that of the benchmark.

(3) Measures the risk adjusted return of the Index and is defined as the difference in return between the Index and the benchmark divided by the tracking error.

(4) This ratio is used to estimate the risk/return profile of the Index and is calculated as the ratio of (actuarial performance of the Index - annual interest rate risk) and the volatility.
