

Index Description

- ❖ The Euronext® Reitsmarket Global Conviction NR Index is designed to track listed real estate worldwide through the performance of a portfolio of 30 global real estate securities selected using a multi-factor ranking methodology and risk optimization techniques out of companies engaged in specific aspects of the major real estate developed markets/regions of the world, namely North America, developed Europe and developed Asia Pacific.
- ❖ The Index uses a multi-factors ranking methodology based on the intrinsic characteristics of the stocks that are part of the same region, namely their respective valuation, fundamental, growth, and momentum characteristics - and retains those securities with optimal combination of characteristics per region. Afterwards, three resulting investable and diversified sub pools are created looking at the respective risk characteristics of the securities incorporated in each regional investable and diversified sub pool.
- ❖ A final step selects the 30 highest ranking securities worldwide out of the 3 multi-factor sub pools, applying risk filters and simultaneously ensuring a minimum of 10% of the Index constituents are selected per region.
- ❖ The Index is expressed in Euro and is not currency hedged.

Winning months	118	109
Losing months	65	74

(2) Measures the risk that the Index's performance deviates from that of the benchmark.

(3) Measures the risk adjusted return of the Index and is defined as the difference in return between the Index and the benchmark divided by the tracking error.

(4) This ratio is used to estimate the risk/return profile of the Index and is calculated as the ratio of (actuarial performance of the Index - annual interest rate risk) and the volatility.
